Huawei Submarine Networks' Profile

Huawei Submarine Networks Co., Ltd. (HSN) was created to meet the growing demands of network operators for end-to-end submarine network equipment, services and solutions capable of delivering highly advanced global communication services.

Formed in 2007 as a joint venture between Huawei Technologies Co., Ltd. and Global Marine Systems Limited, Huawei Submarine Networks brings together the experience of the market-leader in optical communication solutions, subsea cable installation and maintenance with the R&D and manufacturing capabilities of the fastest growing optical networking company in the world.

Huawei Submarine Networks provides a complete turnkey solution for system construction and offers network operators a cost-effective new option for expanding and upgrading their existing networks to meet the bandwidth requirements created by multimedia applications and high-speed internet use. The equipment and services from Huawei Submarine Networks allow telecommunications network providers the opportunity to deliver advanced service offerings and capabilities to their customers in ways that were previously considered impossible.
